# Warning

For your own safety, please read this user manual carefully before your initial start-up!

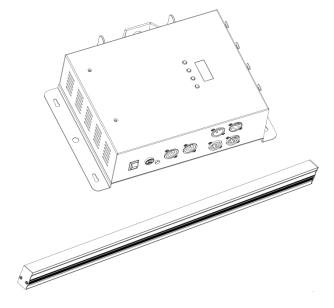

# **Unpacking Instructions**

Immediately upon receiving this product, carefully unpack the carton and check the contents to ensure that all parts are present, and have been received in good condition. Notify the dealer immediately and retain packing material for inspection if any parts appear damaged from shipping or the carton itself shows signs of mishandling. Save the carton and all packing materials. In the event that a fixture must be returned to the factory, it is important that the fixture be returned in the original factory box and packing.

# Your shipment includes:

- Showtec LED Octostrip Set MKII: controller
- Showtec LED Octostrip Set MKII: 8 x LED strips
- 8 x 5-pin XLR cable (5 m)
- Pro power cable (1,5 m)
- User manual

#### **LED Expected Lifespan**

LEDs gradually decline in brightness over time. HEAT is the dominant factor that leads to the acceleration of this decline. Packaged in clusters, LEDs exhibit higher operating temperatures than in ideal or singular optimum conditions. For this reason, when all color LEDs are used at their fullest intensity, life of the LEDs is significantly reduced. If improving the lifespan is of higher priority, place care in providing for lower operational temperatures. This may include climatic-environmental and the reduction of overall projection intensity.

# **CAUTION!**

Keep this device away from rain and moisture! Unplug mains lead before opening the housing!

#### **Safety Instructions**

Every person involved with the installation, operation and maintenance of this device has to:

- be aualified
- follow the instructions of this manual

CAUTION! Be careful with your operations.

With a dangerous voltage you can suffer a dangerous electric shock when touching the wires!

Before the initial start-up, please make sure that there is no damage caused by transportation. Should there be any, consult your dealer and do not use the device.

To maintain perfect condition and to ensure a safe operation, it is absolutely necessary for the user to follow the safety instructions and warning notes contained in this manual.

Please consider that damages caused by manual modifications to the device are not subject to warranty.

This device contains no user-serviceable parts. Refer servicing to qualified technicians only.

#### **IMPORTANT:**

The manufacturer will not accept liability for any resulting damages caused by the non-observance of this manual or any unauthorized modification to the device.

- Never let the power cord come into contact with other cables! Handle the power cord and all connections with the mains with particular caution!
- Never remove warning or informative labels from the unit.
- Never use anything to cover the ground contact.
- Never leave any cables lying around.
- Do not insert objects into air vents.
- Do not connect this device to a dimmerpack.
- Do not switch the device on and off in short intervals, as this will reduce the device's life.
- Do not touch the device's housing bare-handed during its operation (housing becomes very hot). Allow the fixture to cool for at least 5 minutes before handling.
- Do not shake the device. Avoid brute force when installing or operating the device.
- Only use the device indoors, avoid contact with water or other liquids.
- Only operate the fixture after having checked if the housing is firmly closed and all screws are tightly fastened.
- Only operate the device after having familiarized with its functions.
- Avoid flames and do not put close to flammable liquids or gases.
- Always hold the fixture by the transport handles.
- Always keep the case closed while operating.
- Always allow a free air space of at least 50 cm around the unit for ventilation.
- Always disconnect power from the mains, when device is not used or before cleaning! Only handle the power cord holding it by the plug. Never pull out the plug by tugging the power cord.
- Make sure that the device is not exposed to extreme heat, moisture or dust.
- Make sure that the available voltage is not higher than stated on the rear panel.
- Make sure that the power cord is never crimped or damaged. Check the device and the power cord from time to time.
- If device was dropped or struck, disconnect mains power supply immediately. Have a qualified engineer inspect for safety before operating.
- If the device has been exposed to drastic temperature fluctuation (e.g. after transportation), do not switch it on immediately. The arising condensation water might damage your device. Leave the device switched off until it has reached room temperature.
- If your Showtec device fails to work properly, discontinue the use immediately. Pack the unit securely (preferably in the original packing material), and return it to your Showtec dealer for service.
- For adult use only. The fixture must be installed beyond the reach of children. Never leave the unit running unattended.
- Never attempt to bypass the thermostatic switch or fuses.
- The user is responsible for correct positioning and operating of the LED Octostrip. The manufacturer will not accept liability for damages caused by the misuse or incorrect installation of this device.
- This device falls under protection class I. Therefore it is essential to connect the yellow/green conductor to earth.
- Repairs, servicing and electric connection must be carried out by a qualified technician.
- WARRANTY: Till one year after date of purchase.

# CAUTION! Eyedamages!!! Avoid looking directly into the lightsource!!! (meant especially for epileptics)!!!

# **Operating Determinations**

- This device is not designed for permanent operation. Consistent operation breaks will ensure that the device will serve you for a long time without defects.
- The minimum distance between light output and the illuminated surface must be bigger than 1 meter.
- The maximum ambient temperature  $t_a = 40$ °C must never be exceeded.
- The relative humidity must not exceed 50 % with an ambient temperature of 40° C.
- If this device is operated in any other way than the one described in this manual, the product may suffer damages and the warranty becomes void.
- Any other operation may lead to dangers like short-circuit, burns, electric shock, crash, etc.

You endanger your own safety and the safety of others!

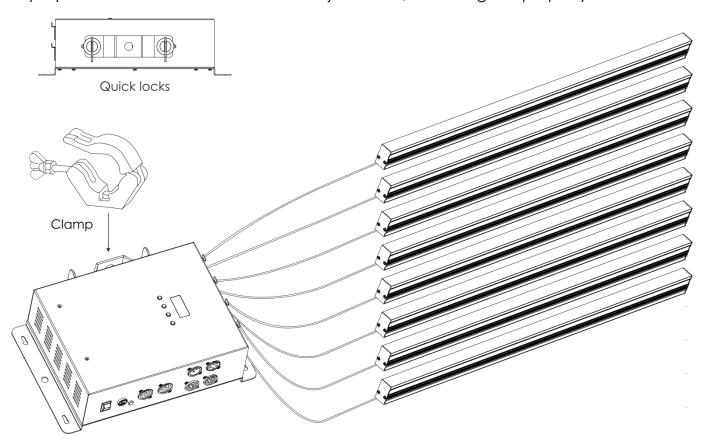

# Rigging

Please follow the European and national guidelines concerning rigging, trussing and all other safety issues.

Do not attempt the installation yourself!

Always let the installation be carried out by an authorized dealer!

Improper installation can cause serious injuries and/or damage of property!

The LED Octostrip Set MKII can be placed on a flat stage floor or be mounted to any kind of truss, with a clamp and the included quick locks.

#### Connection with the mains

Connect the device to the mains with the power-plug.

Always check if the right color cable is connected to the right place.

<u>International</u>	EU Cable	UK Cable	US Cable	Pin
L	BROWN	RED	YELLOW/COPPER	PHASE
N	BLUE	BLACK	SILVER	NEUTRAL
	YELLOW/GREEN	GREEN	GREEN	PROTECTIVE GROUND

Make sure that the device is always properly connected to the earth!

Improper installation can cause serious injuries and/or damage of property!

# **Return Procedure**

Returned merchandise must be sent prepaid and in the original packing, call tags will not be issued. Package must be clearly labeled with a Return Authorization Number (RMA number). Products returned without an RMA number will be refused. Highlite will not accept the returned goods or any responsibility. Call Highlite 0031-455667723 or mail <a href="mailto:aftersales@highlite.nl">aftersales@highlite.nl</a> and request an RMA prior to shipping the fixture. Be prepared to provide the model number, serial number and a brief description of the cause for the return. Be sure to properly pack fixture, any shipping damage resulting from inadequate packaging is the customer's responsibility. Highlite reserves the right to use its own discretion to repair or replace product(s). As a suggestion, proper UPS packing or double-boxing is always a safe method to use.

# Note: If you are given an RMA number, please include the following information on a piece of paper inside the box:

- 01) Your name
- 02) Your address
- 03) Your phone number
- 04) A brief description of the symptoms

#### Claims

The client has the obligation to check the delivered goods immediately upon delivery for any short-comings and/or visible defects, or perform this check after our announcement that the goods are at their disposal. Damage incurred in shipping is the responsibility of the shipper; therefore the damage must be reported to the carrier upon receipt of merchandise.

It is the customer's responsibility to report and submit claims with the shipper in the event that a fixture is damaged due to shipping. Transportation damage has to be reported to us within one day after receipt of the delivery.

Any return shipment has to be made post-paid at all times. Return shipments must be accompanied with a letter defining the reason for return shipment. Non-prepaid return shipments will be refused, unless agreed otherwise in writing.

Complaints against us must be prepared in writing or sent by fax within 10 working days after receipt of the invoice. After this period complaints will not be handled anymore.

Complaints will only then be considered if the client has so far complied with all parts of the agreement, regardless of the agreement from which the obligation is resulting.

# Description of the device

#### **Features**

The LED Octostrip MKII is the successor of the popular Octostrip. It is a complete plug-and-play set; consisting of 8 LED strips, a controller and eight 5-meter long XLR extension cables. The new LED Octostrip MKII can control each strip's 8 individual RGB sections, along with the corresponding dimmer and strobe settings. The device supports ArtNet protocol, which facilitates the use of device while operating in the full RGB mode (192CH mode). The updated color presets and many versatile built-in color flows, in horizontal and vertical directions, are accessible via DMX (in 6CH, 8CH, 14CH, 26CH and 50CH channel modes). It is possible to connect the Octostrip MKI to the new Octostrip MKII. However, in such case, it is not advisable to operate the old and the new version of the device in Auto mode, as the built-in programs differ per version.

- Power Supply: 100-240V AC, 60/50Hz Power Consumption: 90W (full output) Control Protocol: DMX-512, ArtNet Built-in programs: 21 programs
- DMX channels: 6, 8, 14, 26, 50, 192, 208 channels
- Maximum cable lenath: 5 m
- Connectors: Pro power connector, 3-pin XLR IN/OUT, 5-pin XLR LED strip OUT, ArtNet RJ45 IN/OUT
- Control modes: Auto, Built-in programs, Sound-controlled, Static Colors, Master/Slave, DMX/ArtNet
- Cooling: Convection Dimmer: 0-100%
- Strobe: 0-20Hz
- Housing: Die-cast aluminum
- Color: Black IP ratina: IP20 Fuse: T2L/250V
- Dimensions (controller): 200 x 315 x 92 mm (LxWxH) Dimensions (LED strip): 1025 x 30 x 50 mm (LxWxH)
- Weight (controller): 2,3 kg Weight (8 x LED strips): 8 x 1,4 kg

#### Overview

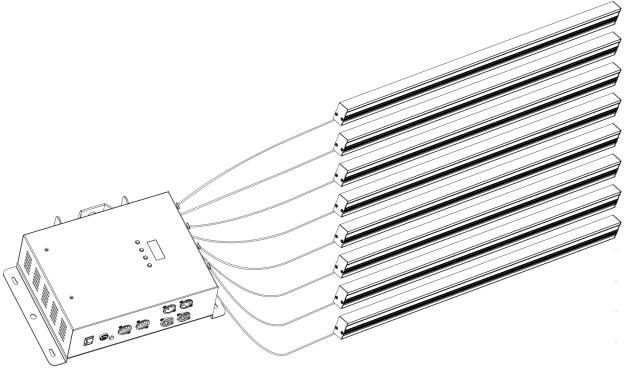

Fig. 01

# **Frontside**

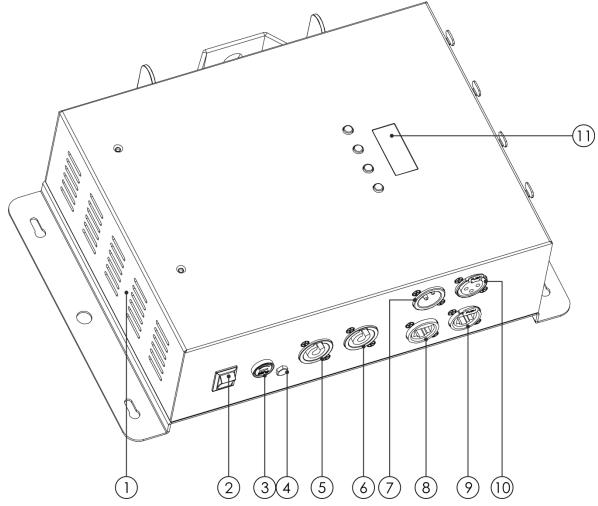

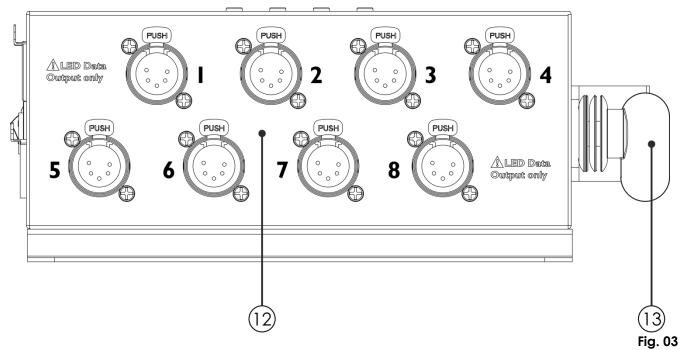

Fig. 02

- 01) Air intake grill
- 02) Power switch ON/OFF
- 03) Fuse T2L/250V
- 04) Ground/earth connection
- 05) Pro power connector 100-240V IN
- 06) Pro power connector 100-240V OUT
- 07) 3-pin DMX signal connector IN
- 08) RJ45 ArtNet signal connector IN
- 09) RJ45 ArtNet signal connector OUT
- 10) 3-pin DMX signal connector OUT
- 11) LCD display + menu buttons

# **Backside**

- 12) 5-pin XLR LED Octostrip MKII 1-8 OUT
- 13) Mounting bracket + quick locks

# Installation

Remove all packing materials from the LED Octostrip Set MKII. Check if all foam and plastic padding is removed. Connect all cables.

Do not supply power before the whole system is set up and connected properly. Always disconnect from electric mains power supply before cleaning or servicing.

Damages caused by non-observance are not subject to warranty.

# **Set Up and Operation**

Follow the directions below, as they pertain to your preferred operation mode.

Before plugging the unit in, always make sure that the power supply matches the product specification voltage. Do not attempt to operate a 120V specification product on 230V power, or vice versa. Connect the device to the main power supply.

#### **Control Modes**

There are 6 modes:

- Auto Mode
- Built-in programs
- Sound-controlled
- Static Colors
- Master/Slave
- DMX-512, ArtNet (6CH, 8CH, 14CH, 26CH, 50CH, 192CH, 208CH)

#### One Octostrip (Auto, Built-in programs, Sound-controlled and Static Color)

- 01) Fasten the effect light to a firm trussing. Leave at least 0,5 meter on all sides for air circulation.
- 02) Plug the end of the electric mains power cord into a proper electric power supply socket.
- 03) When the Octostrip is not connected by means of a DMX cable, it functions as a stand-alone device. When the Octostrip is operating in Sound-controlled mode, it will react to the beat of the background music.
- 04) Please see pages 18, 20 and 21 for more information about Auto, Built-in programs, Sound-controlled and Static Colors modes.

#### Multiple Octostrips (Master/Slave control)

- 01) Fasten the effect light onto firm trussing. Leave at least 0,5 meter on all sides for air circulation.
- 02) Use a 3-pin XLR cable to connect the Octostrips.

The pins:

- 01) Earth
- 02) Signal -
- 03) Signal +
- 03) Link the units as shown in fig. 04. Connect the first unit's DMX "out" socket with the second unit's "in" socket, using a DMX signal cable. Repeat this process to link the second, third, and fourth units.
- 04) Connect the included 8 LED strips to the Octostrip's 5-pin XLR "out" sockets.
- 05) You can use the same functions on the master device as described on pages 18, 20, 21 (Auto, Built-in programs, Sound-controlled and Static Colors). You can set your desired operation mode on the master device and all slave devices will react the same as the master device.

#### Multiple Octostrips (Master/Slave control)

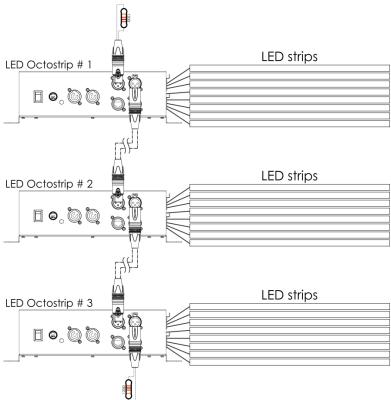

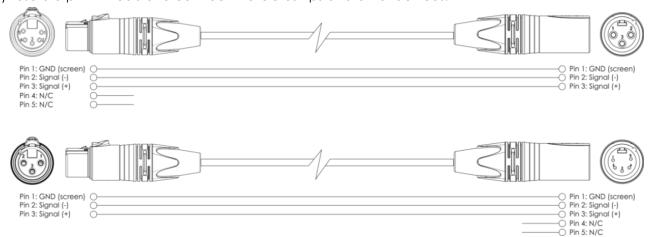

Fig. 04

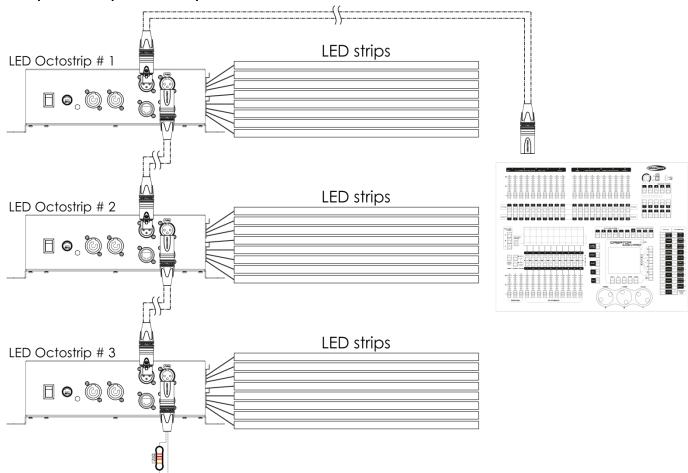

#### **Multiple Octostrips (DMX Control)**

- 01) Fasten the effect light to a firm trussing. Leave at least 0,5 meter on all sides for air circulation.
- 02) Always use a safety cable (ordercode 70140 / 70141).
- 03) Use a 3-pin XLR cable to connect the Octostrips and other devices.

- 04) Link the units as shown in fig. 05. Connect the first unit's DMX "out" socket with the second unit's "in" socket, using a DMX signal cable. Repeat this process to link the second, third, and fourth units.
- 05) Connect a light controller to the first device's "in" socket, using a DMX cable.
- 06) Connect the included 8 LED strips to the Octostrip's 5-pin XLR "out" sockets.
- 07) Supply electric power: Plug electric mains power cords into each unit's Pro power socket, then plug the other end of the mains power cord into proper electric power supply sockets, starting with the first unit. Do not supply power before the whole system is set up and connected properly.

#### Multiple Octostrips DMX Set Up

Note: Link all cables before connecting electric power

Fig. 05

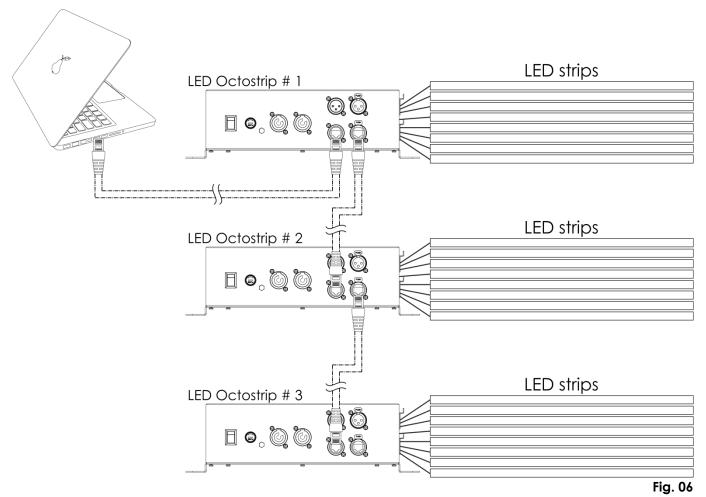

#### Multiple Octostrips (ArtNet Control)

- 01) Fasten the effect light to a firm trussing. Leave at least 0,5 meter on all sides for air circulation.
- 02) Always use a safety cable (ordercode 70140 / 70141).
- 03) Use a CAT-5/CAT-6 cable to connect the Octostrips and other ArtNet devices.
- 04) Link the units as shown in fig. 06. Connect the first Octostrip's RJ45 "out" socket with the second unit's "in" socket, using a CAT-5/CAT-6 signal cable. Repeat this process to link the second, third, and fourth units.
- 05) Using a CAT-5/CAT-6 cable, connect the first Octostrip's RJ45 "in" socket to the PC (Windows or Mac) with installed ArtNet software.
- 06) Supply electric power: Plug electric mains power cords into each unit's Pro power socket, then plug the other end of the mains power cord into proper electric power supply sockets, starting with the first unit. Do not supply power before the whole system is set up and connected properly.

#### Multiple Octostrips ArtNet Set Up

Ordercode: 42232

Note: Link all cables before connecting electric power

# Connecting to a Network

## **ArtNet settings**

- 01) Install any ArtNet-based software on your PC (Windows or Mac) or use a light controller which supports ArtNet.
- 02) Connect the LED strips to the Octostrip controller.
- 03) Connect the power supply to the Octostrip.
- 04) Connect the device's Ethernet connector to your software/light controller's Ethernet connector. Use a CAT-5/CAT-6 cable.
- 05) Set the IP address of your software/light controller to **2.x.x.x** or **10.x.x.x**, depending on the ArtNet settings.
- 06) Set the subnet mask to **255.0.0.0**. on both the Octostrip controller and your software/light controller. Make sure that all the fixtures in the network have a **unique IP address**.
- 07) If you want to connect more than one fixture, follow the example below.

#### Example:

- 01) Make sure that each connected Octostrip has a unique IP address.
- 02) Make sure that the subnet mask on each device is set to 255.0.0.0.
- 03) Set the universe of the first Octostrip to 1.
- 04) Set the first Octostrip's DMX address to 001.
- 05) If you, for example, want to operate the Octostrip in 8CH mode, set the DMX starting address of the second Octostrip to 9, third 17, etc.
- 06) Once you have reached the limit of 512 DMX addresses, set the universe of the next Octostrip to **2**. In this way, you again have 512 DMX channels to work with and you are able to connect many more devices.
- 07) When connecting multiple Octostrips, you can repeat steps 3-6 up to 15 times, each time inserting ascending universe numbers (as there are 15 universes available).
- 08) If you want to connect even more devices, set the net value of the next Octostrip to 2.
- 09) Repeat steps 3-7 until you reach the net limit (each separate net is equipped with 15 universes. There are 127 nets in total. The number of nets depends on the software which you use).
- 10) Using your software (for example <u>50224</u> Arkaos Media Master Express), map all the connected devices, using the settings described above.
- 11) The Octostrips are now ready for use.
- 12) When creating large setups, it is recommended to use a 16-bit, high speed ethernet switch to distribute the ArtNet data signal.

### How to make a data cable

A standard ETHERNET cable can be used to replace the data cable required to transmit the data for the LED Octostrip MKII.

#### Please follow the instructions below in order to create an extra net cable.

Take a standard net cable (CAT-5/5E/6) and connect it to the RJ45 connector, as shown in the picture below (fig. 07). The wires should now be colored as follows:

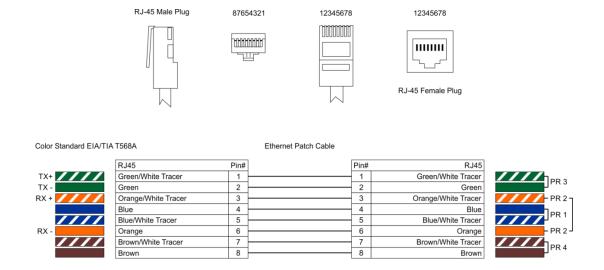

Fig. 07

# Software for controlling

In combination with Arkaos or DMT Software, you are able to play videos over the LED Octostrip MKII. You only have to connect all the Octostrips and run your software.

### 50224

Arkaos Media Master Express

The latest update of the successful media server software.

#### 502267

Arkaos Media Master Pro 4.0: PRO DMX video software for lighting designers.

## **Fixture Linking**

You will need a serial data link to run light shows of one or more fixtures using a DMX-512 controller or to run synchronized shows of two or more fixtures set to a master/slave operating mode. The combined number of channels required by all the fixtures on a serial data link determines the number of fixtures the data link can support.

Important:

Fixtures on a serial data link must be daisy-chained in a single line. To comply with the EIA-485 standard, no more than 30 devices should be connected on one data link. Connecting more than 30 fixtures on one serial data link without the use of a DMX optically isolated splitter may result in deterioration of the digital DMX signal.

Maximum recommended DMX data link distance: 100 meters

Maximum recommended number of fixtures on a DMX data link: 30 fixtures

# **Data Cabling**

To link fixtures together, you must obtain data cables. You can purchase DAP Audio certified DMX cables directly from a dealer/distributor or construct your own cable. If you choose to create your own cable, please use data-grade cables that can carry a high quality signal and are less prone to electromagnetic interference.

#### **DAP Audio DMX Data Cables**

- DAP Audio Basic microphone cable for allround use. bal. XLR/M 3-pin > XLR/F 3-pin. **Ordercode** FL01150 (1,5 m), FL013 (3 m), FL016 (6 m), FL0110 (10 m), FL0115 (15 m), FL0120 (20 m).
- DAP Audio X-type data cable XLR/M 3-pin > XLR/F 3-pin. Ordercode FLX0175 (0,75 m), FLX01150 (1,5 m), FLX013 (3 m), FLX016 (6 m), FLX0110 (10 m).
- DAP Audio cable for the demanding user with exceptional audio-qualities and connector made by Neutrik®. **Ordercode** FL71150 (1,5 m), FL713 (3 m), FL716 (6 m), FL7110 (10 m).
- DAP Audio cable for the demanding user with exceptional audio-qualities and connector made by Neutrik®. **Ordercode** FL7275 (0,75 m), FL72150 (1,5 m), FL723 (3 m), FL726 (6 m), FL7210 (10 m).
- DAP Audio 110 Ohm cable with digital signal transmission. **Ordercode** FL0975 (0,75 m), FL09150 (1,5 m), FL093 (3 m), FL096 (6 m), FL0910 (10 m), FL0915 (15 m), FL0920 (20 m).

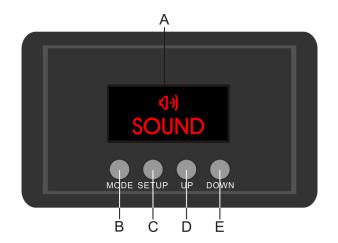

#### **DAP Audio PC Interface Cables**

- CAT-5 cable 7,6 mm Matte blue PVC. **Ordercode** FL55150 (1,5 m), FL553 (3 m), FL556 (6 m), FL5510 (10 m), FL5515 (15 m), FL5520 (20 m).
- CAT-6 cable (recommended for best data transfer). **Ordercode** FL563 (3 m), FL566 (6 m), FL5610 (10 m), FL5615 (15 m), FL5640 (40 m).

The LED Octostrip Set MKII can be operated with a light controller in **control mode** or without the controller in **stand-alone mode**.

### **Control Panel**

- A) LCD display
- B) MODE button
- C) SETUP button
- D) UP button
- E) DOWN button

Fig. 08

#### **Control Mode**

The fixtures are individually addressed on a data-link and connected to the controller.

The fixtures respond to the DMX signal from the controller. (When you select the DMX address and save it, the controller will display the saved DMX address, next time.)

## **DMX Addressing**

The control panel on the front side of the base allows you to assign DMX fixture addresses, which is the first channel with which the Octostrip will respond to the controller.

Please note, when you use the controller, the unit has 208 channels.

When using multiple Octostrips, make sure you set the DMX addresses right.

Therefore, the DMX address of the first Octostrip should be **1(001)**; the DMX address of the second Octostrip should be **1+208=209 (209)**. Please, be sure that you do not have any overlapping channels in order to control each Octostrip correctly. If two Octostrips are addressed similarly, they will work similarly.

**Note:** It is also possible to connect multiple devices by means of ArtNet. See page 13 for more information.

## Controlling:

After having addressed all Octostrip fixtures, you may now start operating these via your lighting controller

**Note:** After switching on, the Octostrip will automatically detect whether DMX 512 data is received or not.

If there is no data received at the DMX-input, the "**LED** " on the control panel will not flash. If not, the problem may be:

- The XLR cable from the controller is not connected with the input of the LED Octostrip MKII.
- The controller is switched off or defective, the cable or connector is detective, or the signal wires are swapped in the input connector.

**Note:** It is necessary to insert an XLR termination plug (with 120 Ohm) in the last fixture in order to ensure proper transmission on the DMX data link.

# Display Off after 60 seconds

When no button is pressed for 60 seconds, the display will turn off. To light up the display, you have to press the MODE, SETUP, UP or DOWN button. Once you have pressed the button, the display will light up.

Settings Settings

Sotware Information

#### 1. Auto

With this menu, you can set Auto mode.

01) Press the **MODE** button until the display shows

02) The device will now run all built-in programs in sequence.

# 2. Built-in programs

Ordercode: 42232

With this menu, you can set the built-in programs.

01) Press the **MODE** button until the display shows

02) Press the **SETUP** button to open the menu.

Press the **UP/DOWN** buttons to choose the desired built-in program. The adjustment range is between **Program UP/DOWN Program** 

Show:01 Up/Down Program Show:21

04) Press the **UP/DOWN** buttons until the display shows

05) Press the **SETUP** button to enter and to toggle between the 2 options below. Once you have chosen the desired option, do as follows:

Color (Press the **UP/DOWN** buttons to choose one of the 39 color presets.)

Strobe (Press the **UP/DOWN** buttons to set strobe frequency. The adjustment range is between 0-99, from OFF to high frequency.)

06) Once you have adjusted the settings, press the **SETUP** button to confirm.

07) Return to step 4 and choose one of the programs from the range: Program Show:02 Program Show:21

08) Press the **SETUP** button to enter and to toggle between the 2 options below. Once you have chosen the desired option, do as follows:

Program speed (Press the **UP/DOWN** buttons to increase/decrease program speed. The adjustment range is between 1-100, from slow to fast.)

Flash 099 Strobe (Press the **UP/DOWN** buttons to set strobe frequency. The adjustment range is between 0-99, from OFF to high frequency.)

09) Once you have adjusted the settings, press the **SETUP** button to confirm.

#### 3. Master/Slave

With this menu you can set the device as a master or a slave device.

- 01) Press the **MODE** button until the display shows
- 02) The device is now operating in slave mode and will react the same as the master device.

#### 4. DMX-512

With this menu you can set the device's DMX starting address and the desired DMX channel mode.

- 01) Press the **MODE** button until the display shows
- 02) Press the **SETUP** button to open the menu.
- Press the **UP/DOWN** buttons to set the desired DMX starting address. The adjustment range is between between between between buttons to set the desired DMX starting address. The adjustment range is between between buttons to set the desired DMX starting address.
- 04) Press the **SETUP** button again to proceed to channel mode settings.
- 05) Press the **UP/DOWN** buttons to choose one of the 7 DMX channel modes: **6CH**, **8CH**, **14CH**, **26CH**, **50CH**, **192CH** or **208CH**.
- 06) Press the **SETUP** button to confirm.

#### 5. Network Settings

With this menu, you can adjust the device's properties, such as the IP address, subnet mask and the universes.

- 01) Press the **MODE** button until the display shows
- 02) Press the **SETUP** button to open the menu.
- 03) Press the **UP/DOWN** buttons to toggle between the 6 options below.

# 5.1. Signal source

With this menu you can select thed esired signal source: DMX or ArtNet.

- 01) Press the **UP/DOWN** buttons until the display shows
- 02) Press the **SETUP** button to open the menu.
- 03) Press the **UP/DOWN** buttons to choose between DMX or ArtNet.
- 04) Press the **SETUP** button to confirm.
- 05) If you have chosen ArtNet, press the **MODE** button until the display shows DMX, for the signal to be received properly. **Otherwise, the device will not function in ArtNet mode.**

#### 5.2. IP address

With this menu you can set the IP address.

- 01) Press the **UP/DOWN** buttons until the display shows 002.146.08
- 02) Press the **SETUP** button to open the menu. The display will show
- 03) Repeatedly press the **SETUP** button to skip to the desired section of the IP address (the currently selected section will blink).
- 04) Press the **UP/DOWN** buttons to set the values.
- 05) Press the **SETUP** button to confirm.

Ordercode: 42232

#### 5.3. Net Mask

With this menu you can set the net mask number.

01) Press the **UP/DOWN** buttons until the display shows

02) Press the **SETUP** button to open the menu. The display will show

- 03) Repeatedly press the **SETUP** button to skip to the desired section of the net mask (the currently selected section will blink).
- 04) Press the **UP/DOWN** buttons to set the values.
- 05) Press the **SETUP** button to confirm.

#### 5.4. Net

With this menu you can set the net number.

01) Press the **UP/DOWN** buttons until the display shows

03) Press the **UP/DOWN** buttons to set the net value. The adjustment range is between

04) Press the **SETUP** button to confirm.

#### 5.5. Subnet

With this menu you can set the subnet number.

01) Press the **UP/DOWN** buttons until the display shows

02) Press the **SETUP** button to open the menu.

O3) Press the **UP/DOWN** buttons to set the subnet value. The adjustment range is between Sub-Net Up/Down Sub-Net

04) Press the **SETUP** button to confirm.

#### 5.6. Universe

With this menu you can set the universe number.

01) Press the **UP/DOWN** buttons until the display shows

02) Press the **SETUP** button to open the menu.

O3) Press the **UP/DOWN** buttons to set the universe value. The adjustment range is between Universe Up/Down Universe Up/Down Universe 15

04) Press the **SETUP** button to confirm.

#### 6. Sound-controlled

Ordercode: 42232

With this menu you can set sound-controlled mode.

01) Press the **MODE** button until the display shows **SOUND**.

O2) Press the **UP/DOWN** buttons to set the sound sensitivity. The adjustment range is between Sensitivity: 00 Sensitivity: 00 Sensitivity: 31, from OFF to high sound sensitivity.

03) Press the **SETUP** button to confirm.

04) The device will now react to the beat of the background music.

#### 7. Static Colors

With this menu you can set the device's static colors.

- 02) Press the **SETUP** button to open the menu.
- 03) Repeatedly press the SETUP button to toggle between 3 colors: Red, Green and Blue.
- 04) Once you have chosen the desired color, press the **UP/DOWN** buttons to set color brightness. The adjustment range for each color is between 0-255, from dark to brightest.
- 05) You can combine Red, Green and Blue (0-255) to create an infinite range of colors.

#### 8. Settings

With this menu you can adjust the device's settings.

- 01) Press the **MODE** button until the display shows **SETTINGS**.
- 02) Press the **SETUP** button to open the menu.
- 03) Press the **UP/DOWN** buttons to choose one of the 3 options below.

#### 8.1. DMX error menu

With this menu you can determine the device's behavior in case of a DMX signal error.

- 01) When the display shows Fail press the **SETUP** button to open the menu.
- 02) Press the **UP/DOWN** buttons to choose between OFF and HOLD.
- 03) If you have chosen OFF, the device will blackout its output, when a DMX signal error occurs.
- 04) If you have chosen HOLD, the device will fall back on the last properly working DMX signal from before the DMX signal error, which ensures undisrupted performance.
- 05) Press the **SETUP** button to confirm.

# 8.2. Display settings

- 01) When the display shows light press the **SETUP** button to open the menu.
- 02) Press the **UP/DOWN** buttons to choose one of the following options: **10s**, **20s**, **30s**, **60s** (the display will turn off when no button is pressed within the preset amount of time) or **ON** (the display will remain continuously on).

#### 8.3. Reset

With this menu you can restore the factory settings.

- 01) When the display shows Reset , press the **SETUP** button to open the menu.
- 02) Press the **UP/DOWN** buttons to choose between YES and NO.
- 03) If you have chosen YES, press the **SETUP** button to confirm. The device will now restore the default settings and will return to the main menu.
- 04) If you have chosen NO, press the **SETUP** button to ocnfirm and the device will return to the previous menu.

# 9. Software Information

With this menu you can monitor the current software version.

01) Press the **MODE** button until the display shows

03) Press the **SETUP** button again to view the software version. The display will show

### Maintenance

The operator has to make sure that safety-related and machine-technical installations are to be inspected by an expert after every year in the course of an acceptance test.

The operator has to make sure that safety-related and machine-technical installations are to be inspected by a skilled person once a year.

The following points have to be considered during the inspection:

- 01) All screws used for installing the device or parts of the device have to be tightly connected and must not be corroded.
- 02) There may not be any deformations on housings, fixations and installation spots.
- 03) Mechanically moving parts like axles, eyes and others may not show any traces of wearing.
- 04) The electric power supply cables must not show any damages or material fatigue.

The LED Octostrip Set MKII requires almost no maintenance. However, you should keep the unit clean. Otherwise, the fixture's light output will be significantly reduced. Disconnect the mains power supply, and then wipe the cover with a damp cloth. Do not immerse in liquid. Do not use alcohol or solvents. Please clean internal components once a year with a light brush and vacuum cleaner. Keep connections clean. Disconnect electric power, and then wipe the DMX connections with a damp cloth. Make sure connections are thoroughly dry before linking equipment or supplying electric power.

### Replacing the Fuse

Power surges, short-circuit or inappropriate electrical power supply may cause a fuse to burn out. If the fuse burns out, the product will not function whatsoever. If this happens, follow the directions below to do so.

- 01) Unplug the unit from electric power source.
- 02) Insert a screwdriver into the slot in the fuse cover. Turn the fuse holder counterclockwise. The fuse will come out.
- 03) Remove the used fuse. If brown or unclear, it is burned out.
- 04) Insert the replacement fuse into the holder where the old fuse was. Reinsert the fuse holder. Be sure to use a fuse of the same type and specification. See the product specification label for details.

# **Troubleshooting**

Ordercode: 42232

This troubleshooting guide is meant to help solve simple problems.

If a problem occurs, carry out the steps below in sequence until a solution is found. Once the unit operates properly, do not carry out following steps.

### No Light

If the light effect does not operate properly, refer servicing to a technician.

Suspect three potential problem areas as: the power supply, the fuse and the LEDs.

- 01) Power supply. Check that the unit is plugged into an appropriate power supply.
- 02) The fuse. Replace the fuse. See page 45 for replacing the fuse.
- 03) The LEDs. Return the LED Octostrip Set MKII to your Showtec dealer.
- 04) If all of the above appears to be O.K., plug the unit in again.
- 05) If you are unable to determine the cause of the problem, do not open the Controller, as this may damage the unit and the warranty will become void.
- 06) Return the device to your Showtec dealer.

### No Response to DMX

Suspect the DMX cable or connectors, a controller malfunction, a light effect DMX card malfunction.

- 01) Check the DMX setting. Make sure that DMX addresses are correct.
- 02) Check the DMX cable: Unplug the unit; change the DMX cable; then reconnect to electrical power. Try your DMX control again.
- 03) Determine whether the controller or light effect is at fault. Does the controller operate properly with other DMX products? If not, take the controller in for repair. If so, take the DMX cable and the light effect to a qualified technician.

Problem	Probable cause(s)	Solution
One or more fixtures do not function at all	No power to the fixture	Check if power is switched on and cables are plugged in
	Primary fuse blown	Replace the fuse.
Fixtures reset	The controller is not connected.	Connect controller.
correctly, but all respond erratically or not at all to the controller	3-pin XLR Out of the controller does not match XLR Out of the first fixture on the link (i.e. signal is reversed)	Install a phase reversing cable between the controller and the first fixture on the link
Fixtures reset correctly, but some respond erratically or not at all to the controller	Poor data quality	Check data quality. If much lower than 100 percent, the problem may be a bad data link connection, poor quality or broken cables, missing termination plug, or a defective fixture disturbing the link
	Bad data link connection	<ul> <li>Inspect connections and cables.</li> <li>Correct poor connections. Repair or replace damaged cables</li> </ul>
	Data link not terminated with 120 Ohm termination plug	Insert termination plug in output jack of the last fixture on the link
	Incorrect addressing of the fixtures	Check address setting
	One of the fixtures is defective and disturbs data transmission on the link	<ul> <li>Bypass one fixture at a time until normal operation is restored: unplug both connectors and connect them directly together.</li> <li>Have the defective fixture serviced by a qualified technician</li> </ul>
	3-pin XLR Out on the fixtures does not match (pins 2 and 3 reversed)	Install a phase-reversing cable between the fixtures or swap pin 2 and 3 in the fixture that behaves erratically
No light or LEDs cut out intermittently	Fixture is too hot	<ul> <li>Allow the fixture to cool down</li> <li>Make sure air vents are not blocked</li> <li>Turn up the air conditioning</li> </ul>
	LEDs damaged	Disconnect the fixture and return it to your dealer
	The power supply settings do not match local AC voltage and frequency	Disconnect fixture. Check settings and correct if necessary

# **Product Specifications**

Model:	Showtec LED Octostrip Set MKII	
Input voltage:	100-240V AC, 60/50Hz	
Power consumption:	90W (full output)	
DMX linking:	30pcs	
Fuse:	T2L/250V	
Dimensions (controller):	200 x 315 x 92 mm (LxWxH)	
Dimensions (LED strip):	1025 x 30 x 50 mm (LxWxH)	
Weight (controller):	2,3 kg	
Weight (8 x LED strips):	8 x 1,4 kg	
Operating and Programming:		
Signal pin OUT:	Pin 1 (earth), pin 2 (-), pin 3 (+)	
DMX Mode:	6, 8, 14, 26, 50, 192, 208 channels	
Signal input:	3-pin DMX/RJ45 IN	
Signal output:	3-pin DMX/RJ45 OUT	
LED strip output:	5-pin XLR OUT	
Electro-mechanical effects:		
Dimmer:	0-100%	
Strobe:	0-20Hz	
Housing:	Die-cast aluminum	
Control protocol:	DMX-512, ArtNet	
DMX control:	via standard DMX-controller	
Onboard:	LCD display for easy setup	
Control:	Auto, Built-in programs, Sound-controlled, Static Colors, Master/Slave, DMX/ArtNet	
IP rating:	IP20	
Connections:	Dedicated Pro power to Schuko & data connector	
Cooling:	Convection	
Max. ambient temperature $t_a$ :	40°C	
Max. housing temperature $t_B$ :	80°C	
Minimum distance:		
Minimum distance from flammable surfaces:	0,5 m	
Minimum distance to lighted object:	1 m
